How to employ privacy by design in the fight against COVID-19

Publications

"...the promotion of public health and the protection of privacy do not have to add up to a zero-sum game. Implementing smart tech solutions that contain privacy by design features can, in many cases, effectively promote public health goals while minimizing the risks to privacy."

Assaf Harel, partner, who leads Gornitzky's Cyber-Security and Privacy Practice in an article that was published in the IAPP's 'Privacy Advisor'.
