First Step towards an Israeli GDPR?

Client Updates

A new bill seeks to reduce the scope of the requirement to register databases containing personal data and to align key terms in the Israeli Protection of Privacy Law, 5741-1981 with the EU General Data Protection Regulation.

In this client update, partner Assaf Harel, who leads our firm's Cyber-Security and Data Protection practice, provides a brief overview of the proposed changes.

This update was prepared with the assistance of Linor Vertnik.
