**Gornitzky represents Y.T.Y. Lenny Investments Ltd., the leading investor in a Series A round venture capital investment in Guardian Optical Technologies Ltd, which is developing an advanced 3D sensor for improving vehicle safety**

News

**Guardian Optical Technologies is an innovative Israeli startup developing an advanced 3D sensor. Guardian's sensor makes cars safer and enables them to distinguish between still objects and human beings thanks to the presence of a beating heart.**

This sensor will prevent drivers from forgetting infants in the car as well as serve as a sensor for seat belts, the airbag system, monitoring driving, movement recognition, driver recognition, black boxes and many other applications.

Y.T.Y. Lenny Investments Ltd. was represented by Timor Belan (Partner) and Avi Meer.
